The essentiality of the design endows even the most impersonal function with structure and individuality.

The Vespa 946 is a pure expression of a style synonymous, in the minds of millions of travellers and devotees, with freedom of movement and expression.

A far-sighted projection of sustainable mobility, whose form and substance crystallise the fundamental aesthetic and dynamic values of the history of the two-wheeler.

.....

VESPA 946. BACK FROM THE FUTURE.

S T A T E O F T H E A R T

Great ideas move the world. Keeping faith with those ideas is the only way to progress.
As the Vespa 946 has done: turning the bearing structure of the original model into a lighter,
more aerodynamic version, with a welded steel and aluminium monocoque frame.

From the saddle support to the inserts on the side panels,
every centimetre has a detail of excellence to attract the eye.

VESPA 946. INSTINCTIVELY AWARE.

B L A C K

W H I T E

D E T A I L S

Real luxury is realising a more ambitious and fascinating dream every day.

Today the Vespa 946 re-affirms its legend.

It enhances the classical values of tradition: the shape of the handlebar, the proportions of the fairing, the plunging curves of the saddle all come from the earliest drawings. Every detail reflects a choice and a reference to Italian-style production, a craftsman's approach in a futuristic dimension.

The Vespa 946 is made to man's measure. And to the measure of the universe.

A throbbing technological heart, perfect for long distances and for city travel.

The 4-stroke 125 cc monocylinder engine responds to requirements that may still be nascent.

And it guarantees the best performance in its category.

Electronic injection, 3-valve distribution, reduced friction and improved fluid dynamics sharply reduce consumption and emissions, establishing a new benchmark over and beyond current regulations. The Vespa 946 comes with all-digital instrumentation, full LED lights, ABS braking and ASR traction control. Superior construction quality to make it a winner on every road, the means to reach every destination.

.....

VESPA 946. A VOCATION FOR ECO-SUSTAINABILITY.

H A N D - M A D E

Attention to detail has been an integral part of the project from the very start.
But when the Vespa 946 begins moving along the production line, then it really becomes a unique item.

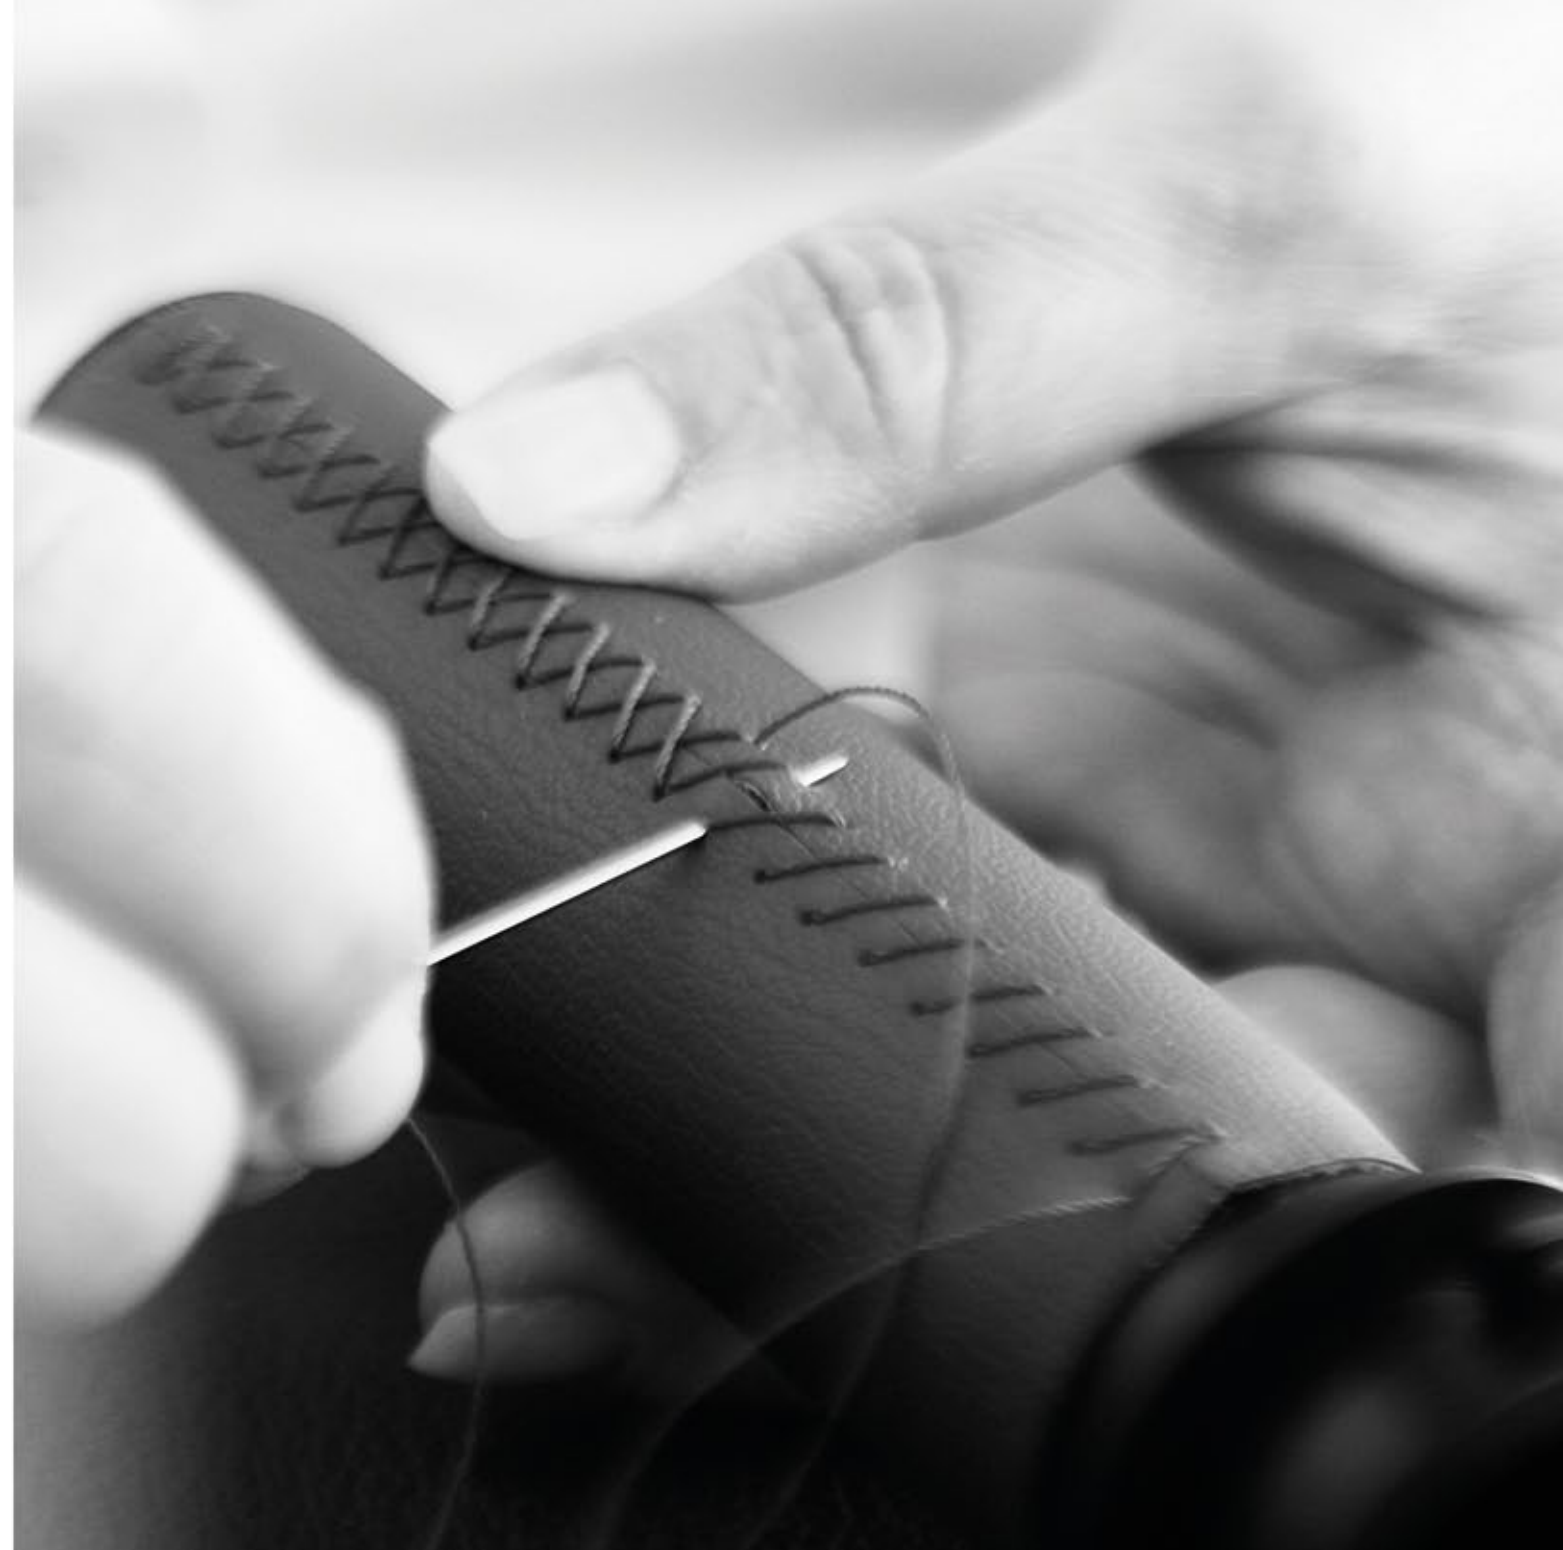

From the first stitching on the hand-grips to the final polish,
everything is done by hand, with the same care as a couturier for his creations.

With the attention and passion of an artist's atelier.

Because a craftsman is an artist.

.....

VESPA 946. THE CARE OF THE CRAFTSMAN.

A C C E S S O R I E S

This outstanding gem could only come with a wealth of quality accessories. From the bags to the hand-grips and protection covers, every item has been designed, developed and tested with the same taste and care as the Vespa 946 itself. The opportunity to enhance the scooter with exclusive details is a privilege and a further exercise in style.

A mark of distinction.
For the owner, not just for the scooter.
